PROFILE SUMMARY

Self-taught full stack developer specializing in MERN, with a strong desire to create scalable and maintainable applications. Proven expertise in JavaScript, complemented by analytical and problem-solving skills. Eager to contribute dynamic talents to organizations seeking innovation in web development.

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript

Back End Development: Node.js, Express.js, RESTful API Development, Repository Architecture, MVC Architecture, Schema Design, Socket io

Front End Development: React, Redux, WebSocket, Tailwind CSS, Bootstrap, HTML, CSS

Database: MongoDB, PostgreSQL

Tools: Git, GitHub, Postman, VS Code, Figma

Expertise in: Data Structures & Algorithms

Familiar with: AWS, C, Java, Firebase

PROJECTS

Frenzy – Furniture Booking Application

[Live Link](#) | [GitHub](#)

Developed a full-featured furniture booking application that allows users to browse, search, and order furniture products through a clean and user-friendly interface.

- Users can browse and order furniture products easily through an intuitive UI.
- Implemented product search, filtering, and sorting functionalities for better user experience.
- Integrated secure online payments using Razorpay.
- Implemented user authentication with Google OAuth.
- Automated email notifications using Nodemailer.
- Deployed the application with CI/CD workflows using GitHub Actions
- Technologies Used: Node.js, Express.js, MongoDB, EJS, CSS, Razorpay, Google OAuth, Nodemailer, GitHub Actions, Render

MINI PROJECTS

USM – User Management System

[Live Link](#) | [GitHub](#)

Developed a full-stack User Management System that enables secure authentication, role-based access control, and profile management. The application allows administrators to manage users efficiently while providing users the ability to update and maintain their personal profiles

- Implemented secure authentication using JWT with protected routes for admin and users..
- Developed role-based access control to differentiate admin and user privileges.
- Enabled users to update and manage their profile information securely.
- Built CRUD functionality for managing user accounts (create, view, edit, delete).
- Integrated file upload functionality for profile images using cloudinary.
- Technologies Used: Node.js, Express, MongoDB, React MVC Architecture, GitHub, cloudinary

To Do List Application

[Live Link](#) | [GitHub](#)

A dynamic To-Do list application built with React, designed to help users manage their tasks efficiently. The application utilizes local storage for persistent data management, ensuring that user tasks remain saved even after the browser is closed or refreshed.

OLX Clone

A clone of OLX designed using React, utilizing Firebase Auth service for user authentication and Firebase Storage for storing images of the products. Registered users can add their products to sell

EDUCATION

MERN Stack Development

Prototype, Calicut

2024

Electronics and Communication Engineering

KMCT polytechnic college mukkam, kozhikode
CGPA: 6.82

2020 - 2022
