VISHNU P

Full Stack Developer | MERN Stack & TypeScript

Malappuram, Kerala, India | +91 7306268318 | vishnujithu61@gmail.com | LinkedIn | GitHub | Portfolio

Professional Summary

Full Stack Developer with hands-on experience building full-stack web applications using JavaScript, TypeScript, React.js, Node.js, and Express.js. Built and shipped projects including Frenzy, an e-commerce/booking platform with Razorpay payments, Google OAuth, and automated CI/CD via GitHub Actions, and USM, a role-based user management system with JWT authentication. Skilled in RESTful API design, MVC and repository-layer architecture, and relational and NoSQL database modeling (PostgreSQL, MongoDB). Self-directed learner who has independently taken projects from database schema design through deployment.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, Java, C
Frontend: React.js, Redux, Next.js concepts, Tailwind CSS, Bootstrap, HTML5, CSS3, WebSocket
Backend: Node.js, Express.js, RESTful API Development, MVC Architecture, Repository Pattern, Dependency Injection, Socket.IO
Databases: MongoDB, PostgreSQL, Firebase, Mongoose, Schema Design
Authentication & Security: JWT, OAuth 2.0 (Google), Role-Based Access Control (RBAC), bcrypt
DevOps & Tools: Git, GitHub, Postman, VS Code, Figma, AWS (familiar)

Projects

Frenzy — Full Stack Furniture Booking & E-Commerce Platform Live Demo

Node.js · Express.js · MongoDB · EJS · Razorpay · Google OAuth · GitHub Actions

- Engineered a full-stack e-commerce and booking platform enabling users to browse, search, filter, and order furniture through a responsive, user-friendly interface.
- Designed and implemented product search, filtering, and sorting features, improving product discoverability and user experience.
- Integrated secure payment processing with the Razorpay API, enabling reliable online transactions.
- Implemented user authentication using Google OAuth 2.0, streamlining sign-up and login flows.
- Automated transactional email notifications using Nodemailer, improving user engagement and order communication.
- Configured and deployed a CI/CD pipeline using GitHub Actions to Render, reducing manual deployment steps and release time.

Talky Talky — Real-Time Chat Application Live Demo

React.js · Node.js · MongoDB · Express.js · Cloudinary · Socket.IO

- Built a real-time chat application enabling users to discover other registered users, send connection requests, and start chatting once a request is accepted.
- Implemented a request/accept-based connection system to control who users can message, similar to a friend-request flow.
- Integrated Cloudinary for storing and serving user profile images.
- Designed the React frontend and Express/MongoDB backend with a RESTful API to support user discovery, requests, and messaging.

USM — User Management System (RBAC & Authentication) Live Demo

Node.js · Express.js · MongoDB · React · JWT · Cloudinary

- Built a full-stack user management system implementing secure JWT-based authentication with protected routes for admin and user roles.
- Developed Role-Based Access Control (RBAC) to enforce differentiated permissions between admin and standard users.
- Implemented full CRUD functionality for user account management, including create, read, update, and delete operations.
- Integrated Cloudinary for profile image upload and storage, improving media handling and load performance.
- Applied MVC architecture to separate concerns across controllers, services, and data models for maintainable code.

To-Do List Application

React.js · Local Storage

- Built a dynamic task management application in React with persistent state using browser local storage.
- Designed reusable, component-based UI architecture to support task creation, editing, and completion tracking.

OLX Clone — Classifieds Marketplace App

React.js · Firebase Auth · Firebase Storage | GitHub

- Developed a classifieds marketplace clone with Firebase Authentication for secure user sign-in.
- Implemented Firebase Storage integration for product image uploads, enabling registered users to list items for sale.

Education

MERN Stack Development 2024

Brototype, Calicut — Intensive full-stack development program covering JavaScript, React, Node.js, Express.js, and MongoDB

Diploma in Electronics and Communication Engineering 2020 – 2022

KMCT Polytechnic College, Mukkam, Kozhikode — CGPA: 6.82
